Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17, 25-31, drawn to a method to seal a porous dielectric, classified in class 427, subclass 255.4.
- II. Claims 18-24, drawn to a device, classified in class 428, subclass 319.9.

Distinctness

The inventions are distinct, each from the other because:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process as claimed can be used to make other and materially different product such as a product made by exposing a porous dielectric to a phosgene coupling agent.

Claim 1 of Group I is generic to a plurality of disclosed patentably distinct species of:

(A) a *coupling agent*: (i) a coupling agent comprising **acetyl chloride** (Claims 2-3), (ii) a coupling agent comprising **succinyl chloride** (Claims 4-5), (iii) a coupling agent comprising **phosgene** (Claims 4-5), (iii) a coupling agent comprising *both* acetyl chloride and phosgene (Claims 4-5), (iv) a **silane** coupling agent comprising a thiol cap (Claims 12-17, 25-31);

(B) a *sealing agent*: (i) a sealing agent comprising a **crosslinking agent** (Claims 8-9), (ii) a sealing agent comprising a **capping agent** (Claims 10-11).

Art Unit: 1762

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species of (A) and (B), even though this requirement is traversed.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Mr. Michael D. Plimier on December 20, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
